

The cemetery is divided into Sections labelled A to Z and Aa to Yy and on an extension of the cemetery, Sections Ax to Rx. Plots in each section are numbered to give each grave a single locator.

In the age column, ages are given in years, otherwise with the following suffixes: m = months, w = weeks, d = days, h = hours and min = minutes.

Due to data protection constraints, (eg. Spouses or family still living at locations shown in the Registers), the address column has been redacted. Anyone tracing relatives graves can obtain this information from the Registers at Gilroes Cemetery & Crematorium. Society members overseas requiring further information are recommended to contact us by email at: [projects@lrfhs.org.uk](mailto:projects@lrfhs.org.uk)

From about March 1979 the date of death was included so a column has been added into the lists for this information.

In some cases additional information was given in the entries and has been added as a comment to the cell. This is shown by a red triangle in the top right-hand corner of the cell and the comment box can be viewed by moving the mouse over the cell.

Also included in the list is burial of urns or caskets and scattering of ashes from Cremations with the comment box showing additional information (eg. where the Cremation took place).

Cemetery and Section layouts (where available) are also included on the CD to assist finding the location of burial plots.

There will be mistakes, even though all entries have been checked. If mistakes are found, please tell us.
